Some application examples for the All-In-Sensor in everyday life

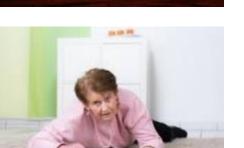

Security

protects your home, holiday home and company from break-ins, fire, gas, water and many other everyday dangers

Smart device control

Control your electrical devices automatically through the All-In-Sensor or manually from your smartphone. Regardless of whether it is light, lawn sprinkler, air conditioning, heating, air humidifier, charging station for the electric car, every electrical device can be intelligently controlled immediately.

Fire alarm

See exactly in which room there is a fire and whether there are currently people in the room(s). Receive the alarm with all information directly on your smartphone.

Senior surveillance

You always know whether your relatives are active / mobile at home.

And also whether they forgot to turn off the gas, water or stove.

Terrace, property

You will be informed immediately if someone unauthorized enters your property.

Child monitoring

You are visiting the neighbors, the children are in bed. When the children wake up, turn on the light, open a door, walk around the room, you will immediately receive information and can check if everything is going well.

Mold growth

Mold formation in rooms is harmful to our health, the sensors report in good time if an unhealthy indoor climate is formed.

Visitor notifications and counters

Get notified when the parcel delivery man is at your house or customers enter the shop.

Caravan and RV

You don't want to experience any unpleasant surprises on vacation. Secure your motorhome or caravan against break-ins, anesthetic and propane and CO gas, fire, water or towing

Suitcase

During the holiday trip you always know where your luggage is. Also, you get notified immediately if someone tries to steal or open your luggage.

Hotel room

Protect your property so that nobody can enter the room unnoticed and search through your belongings.

Pet in the car

If you have to run an errand quickly and your dog has to stay in the vehicle, the All-In-Sensor informs you in good time before the heat becomes dangerous for the dog.

Camping in nature

You are out in nature and spend the night in a tent, the All-In-Sensor ensures that no visitors (whether humans or animals) can approach your tent unnoticed.
